In reply to your letter No L 431/ML 57-32-3 dated the

8/14th July, 1932, with reference to the gift of the open ground North of the School of Engineering to that school for use as a play ground etc , I have the honor to state that this plot of land besides being used by the City Police as a Parade Ground is also used by them as a Sports Ground for which purpose they have been to some expense in preparing it putting up goal posts for hockey etc The Police as well as the pupils of the School of Engineering are in need of a recreation ground and any other plot suitable for this purpose does not appear to be available in this ~~own~~ neighbourhood 'At present both the Police and the pupils together use this site as a play ground and it could be made available for the exclusive use of the latter on any occasion on which they so desire to use it, provided they will give notice and the Police do not then require it

I do not consider that the ground should be alienated for the sole occupation of the pupils of the School of Engineering That would mean that the Police would be bereft of their play-ground and who have to seek for one less conveniently situated

SIR

With reference to your letter No L 777/ML 57-32-5 dated 30th July 1932, calling for a sketch plan of the open ground situated to the North of the School of Engineering, Fort, Bangalore, I have the honor to submit herewith a plan of the grounds and to state that the school of Engineering may be allowed to use the open ground as play ground during the evenings and that it is reported that a strip of land 30 feet in width as shown in the plan is considered to be necessary to keep off the noise caused by the boys often collecting at the place and disturbing the class work and also to prevent the nuisance being committed by the passersby the area of this strip of land proposed to be reserved comes to about $\frac{1}{2}$ acre only

I therefore request that Government may be pleased to allow the School of Engineering to use the ground as play ground during the evenings and also that a strip of land 30 feet in width to a length of 351 feet may be kindly ordered to be added on to the school, which portion will be enclosed with wire fencing
